New Address: Rt 7, Frederick, Md. 21701

3/1/68

Dear Mr. Lesansky,

Overwhelming, and I do appreciate it.

I think you can get enough from PHOTOGRAPHIC WHITEWASH for your class. I also think it will be "fresh", for few people have ever heard of the book or its contents. Is not the failure of the press to mention it, save for the initial story in the New York Times, also suppression?

There remains, in my thinking, another kind of suppression approach. I believe that the withholding of any data is inacceptable. The protection of stoolies is not as important as learning the truth. What little there is that might defame people (and Godknow much of that is not restricted in any way-even published) can be edited if necessary. However, someone not suffering the special kinds of official blindness should be able to see it. I believe most of the suppression is to protect the gov't.

Again thanks, See you when possible.

Sincerely,

Harold Weisberg
